FAROKHI
INDUSTRIAL AND
COMMERCIAL GROUP

OUR SERVICES AND ACTIVITIES

Calculations of reverse engineering, molding and modeling design
Machining, manufacturing and in-site/in-place machining
Casting, welding and assembly
Maintenance of production lines of petrochemical and oil plants
Manufacturing of all kinds of parts and machinery for the metals industry
Implementation of industrial and machine building and production projects
Implementation of coastal and offshore projects
Marine & Diving Services
Commercial Services

PRINCIPAL SUBSIDIARIES

Tel: +982188553652 www.farokhigroup.com

FAROKHI
INDUSTRIAL AND
COMMERCIAL GROUP

Computation and Design With the help of professional and highly experienced designers and draftsmen using SOLIDWORKS, CATIA, ANSYS, ABAQUS, 3Ds MAX, FLOW-3D software, etc. accompanied by 10 thoughtful and expert engineers, we are capable of doing practical operations with all industrial factories worldwide

LABORATORY AND QUALITY CONTROL

HEAVY

HEAVY DUTY LATHE MACHINING

HEAVY DUTY LATH MACHINING

Heavy duty lath machining
14000 mm in length and 7000
mm in diameter with lathing
and carousel machines, boring
and gate milling machines and
grinding large parts

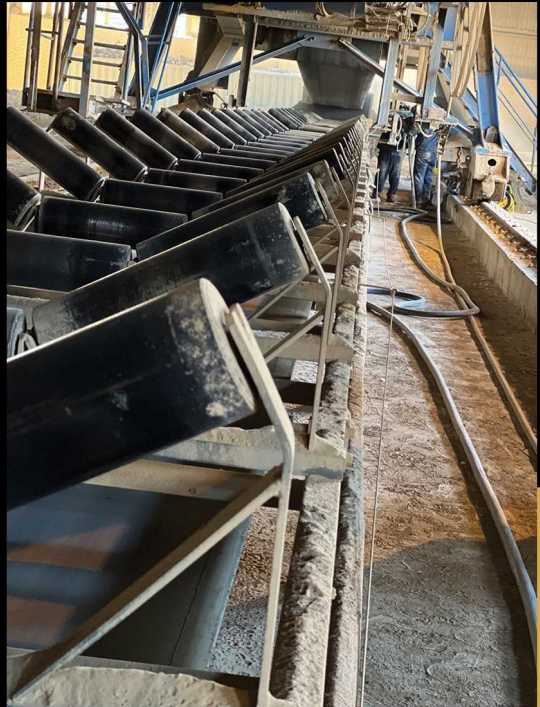

HEAVY DUTY LATH MACHINING

PRODUCTION

All kinds of rubber and metal rolling

All kinds of Charrette Pulleys and Steel gear couplings

All kinds of Helical gear racks, special and general chain sprockets

MACHINING OPERATIONS ARE PRACTICED BY A FULLY PROFESSIONAL TEAM

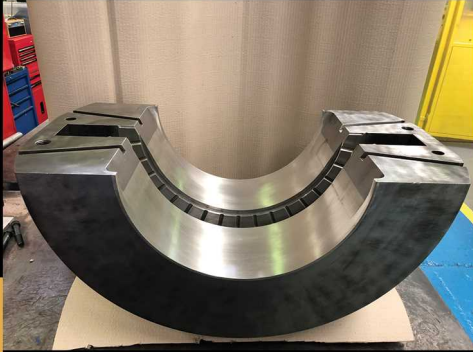

Machining operations are practiced by a fully professional team that can grind, lathe, tap large thread sizes, base-plates, and also machine all kinds of rims... Our engineering teams are capable of designing and processing tasks on-site in a short amount of time. We can provide services in the shortest lead time with the best quality

WE SPECIALIZE IN CASTING VARIOUS TYPES OF MANGANESE STEELS

We specialize in casting various types of manganese steels, Pro Chrome, cast iron (including ductile, white, hard, and alloy), and refractory alloys. All of our castings are accompanied by NPT reports as requested by the employer, and we also provide a witness sample for each part. At our company, there are no restrictions on the types of castings we can produce

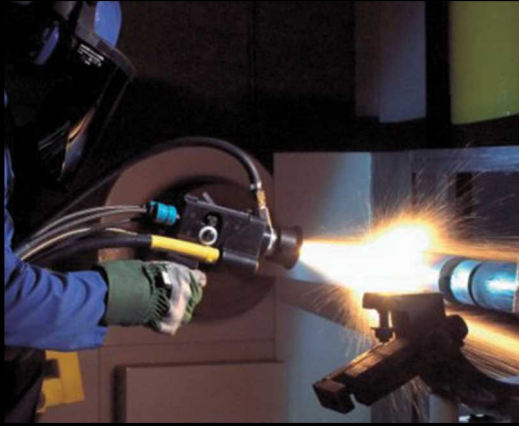

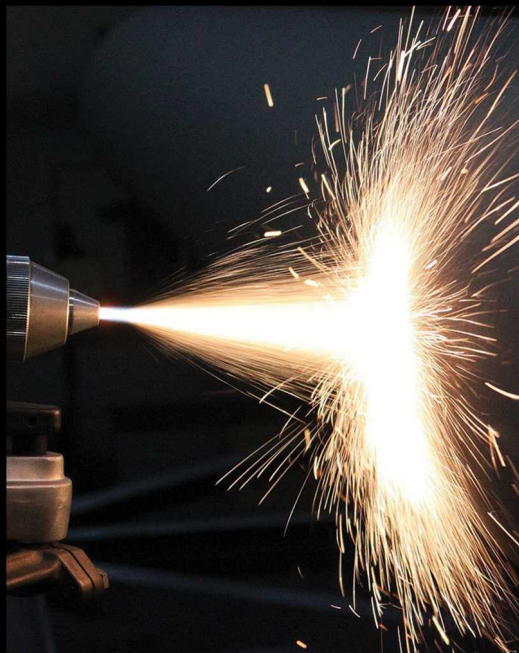

BABBITTING ALL KINDS OF BRONZE BUSHINGS

Babbitting All kinds of bronze bushings, Die casting, Aluminum and bronze alloys, casting all kinds of alloys with specialized furnaces.

METALLIZATION OF ALL TYPES OF BABBITT ALLOYS

Metallization of all types of Babbitt alloys, and hard alloys, and repairing by metal-spray and hard chrome plating. This section has spraying and devices for thickness measurement and surface roughening. Also, Grinding and lathing operations will be metal-sprayed afterward

MODELING BY HAND AND USING MANUAL TOOLS

WAX MODELING CNC MODELING AND 3D PRINTING

WELDING ALL TYPES OF ALLOYS WITH THE ACCOMPANIMENT OF A SUPERVISOR ENGINEER

Underwater Mig/Tig welding, Cold welding in the range and amperes of Gouging and surface-removal operations. Our company has an operational team for providing reports and WPS writing, as well as UT nun level 3 and a fully proficient team in ITP. The welders working in this company are specialists who have all the required certificates according to their career

WELDING ALL TYPES OF ALLOYS WITH THE ACCOMPANIMENT OF A SUPERVISOR ENGINEER

Underwater Mig/Tig welding, Cold welding in the range and amperes of Gouging and surface-removal operations. Our company has an operational team for providing reports and WPS writing, as well as UT nun level 3 and a fully proficient team in ITP. The welders working in this company are specialists who have all the required certificates according to their career

CONSTRUCTION OF WEIGHING SYSTEMS

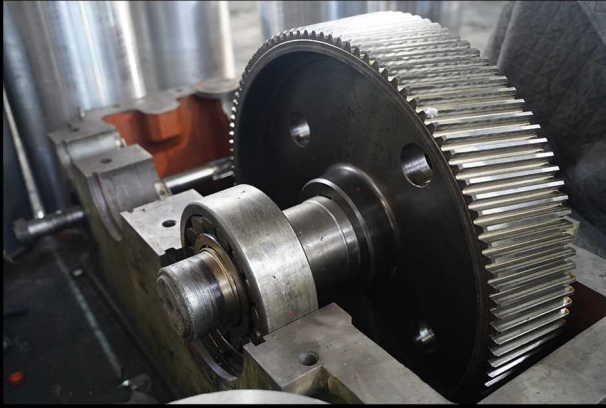

Construction of weighing systems, Continuous Production line, manufacturing all types of Large-sized chains with high precision, General and horizontal lines

MAKING SIMPLE AND DIAGONAL GEAR WITHOUT RESTRICTIONS ON DIAMETER AND WEIGHT

Making simple and diagonal gears without restrictions on diameter and weight, manufacturing all types of pinion cranks and specific gears, grinding gears, and providing quality certificates related to the gears Troubleshooting and repairing large and defective gears

IN OUR TEAM, WE CARRY OUT THE DESIGN ALONG WITH THE ANALYSIS FOR THE CONSTRUCTION OF THE GEARBOX

and after that, the gearbox is made and produced with full knowledge of any required activity. This set of gearboxes has an unconditional warranty. Our team of professional engineers and experienced employees, who have previously worked for major companies worldwide, confidently guarantee all large-sized gearboxes. We have expert teams who will carry out repairs with perfect attention to detail, covering small-gear gearboxes, gaps, bearing belts, and other related issues

HEAT TREATMENTS FOR FORGING OPERATIONS ARE APPLIED DIRECTLY

Heat treatments for forging operations are applied "directly" on parts weighing up to 130kg with no indirect restrictions, based on their Metallurgy conditions. Using heavy hammers, forge molding, and heat treatment furnaces.

CONTRACTING OPERATING LINES OF MECHANICAL AND INDUSTRIAL ELECTRICITY

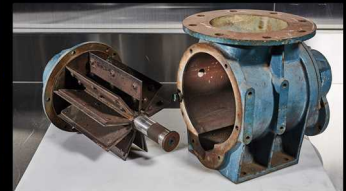

Contracting operating lines of mechanical and industrial electricity, with the cooperation of experienced engineers in local industries, cement, steel, petrochemical, and power plants, highly capable of industrial exploitation.

HIGHLY CAPABLE OF INDUSTRIAL EXPLOITATION

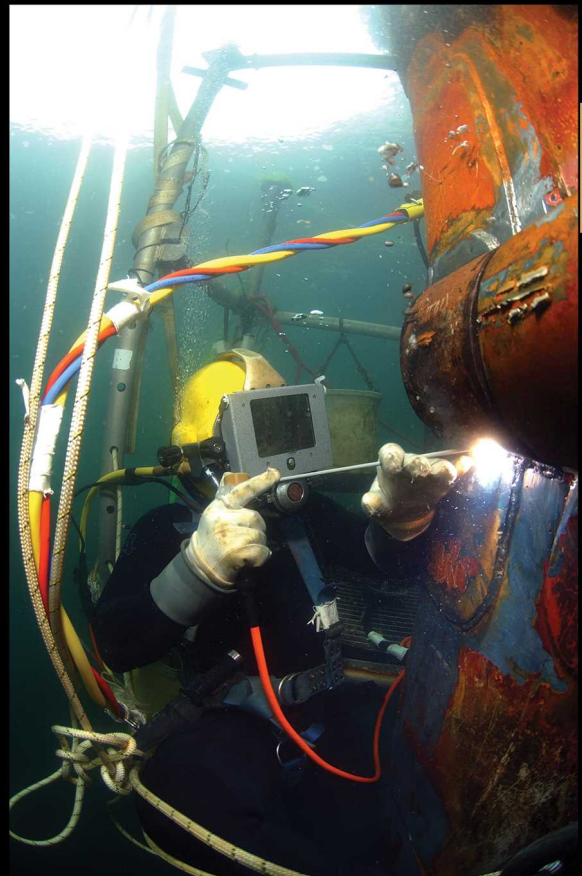

**REPAIR AND MANUFACTURE
OF COMPRESSOR
BLOWER MACHINE PARTS
ROTARY
MECHANICAL SEAL
WELL VALVES AND**

IMPLEMENTATION OF COASTAL AND OFFSHORE PROJECTS

Specialized implementation team in industrial marine services, diving and marine projects

**OUR COMPANY COLLABORATES
WITH NUMEROUS INTERNATIONAL
FIRMS TO FACILITATE THE TRADING
IMPORTING, AND EXPORTING OF VARIOUS
INDUSTRIAL GOODS THROUGHOUT THE COUNTRY**
